but will serve for any of the NEW-ENGLAND STATES.*

BY NATHANAEL LOW.

BOSTON: Published and sold, wholesale and retail, by  
**MUNROE & FRANCIS, No. 4, Cornhill.**

Sold also by the other Booksellers and Traders in New-England  
Price 5 dollars a groce; 50 cents a dozen; 8 cents single.

## ADDRESS TO PATRONIZING FRIENDS.

WHILE I am presenting you with the fiftieth impression of my Almanack, and consider the long series of years, in which it has been favoured with an extensive circulation, I feel myself impressed with the most lively sensations of gratitude for that liberal patronage which you have so uniformly, and so generously bestowed. The reflection flatters me, that I have been useful to my fellow-men, in a degree, not derogatory to the limited sphere in which I have moved; and this idea fills me with delightful emotions. For he, whose ultimate wishes terminate in himself; who feels not a glow of love for mankind; and an ardent and active zeal for their good; who feels not a moving principle within him, proclaiming his obligation, and impelling him to devote all the energy of his soul to their service; is a nuisance to human society, and most grossly abuses the talents given him by his Creator, for these essential purposes. It is by these qualities that we estimate the merits of men. It was these, which eminently warmed and filled the heart of Washington, and waited him to glory on the blessings of mankind:—While the detested misanthrope lives only in their excoriations, recorded in letters of blood.

If the reader can find any thing gratifying to his palate, either original or selected, which has been served up for his entertainment, in this little production, I shall feel myself amply compensated for my trouble. If any errors have crept into the Astronomical department, it has been in despite of the most assiduous attention to correctness, and it is hoped that the indulgent reader will not find them inexcusable. For my meteorological predictions I have resorted to the observations of the most distinguished Astrologers. The Census of Massachusetts and New-Hampshire, giving at one view the population of all the towns and plantations in these States, will be useful for reference, especially at elections.

In the Calendar pages are given, occasionally, the rising, setting and setting of a number of stars; also, the difference between apparent and mean time, or that shown by the Sun and a well-regulated clock or watch, called the equation of time, which depends on the inequality of the ecliptic. It is presumed that the reader will know how to apply these without any direction. Perhaps it may not be improper to observe, that all the calculations in this Almanack are according to the apparent time.

And now I commend it and myself to the Divine protection, hoping, should Providence uphold me in life and ability another year, and my exertions should be deemed meritorious of your encouragement, to be enabled to add greater improvements and to furnish still more for your use and entertainment. May that Almighty Being, who arbitrates the destinies of man; "who bids the crimson current roll; the vital movements play;" preserve you in health, prolong your lives in usefulness, and shower down his blessings upon all your lawful enterprises.

Berwick, (Massachusetts,) Sept. 1812.

N. LOW.

## FRIENDS' YEARLY AND QUARTERLY MEETINGS.

Yearly meeting, 7th day after 2d 6th d. 6th mo. at Portsmouth, R.I.  
Meeting for worship the 1st day following at Newport & Portsmouth.

R. Island Quarter.	Somerset, Mass. 1st 5th day 11th mo.	Falmouth (Maine) Quarter.	Windham 5th d. bef. last 6th d. 2d m.
	Providence, R.I. 1st 5th day, 5th mo.		Vassalboro' 5th d. bef. last 6th d. 2d m.
	E. Greenwich 1st 5th d. 5th mo.		Durham, 5th d. bef. 1st 6th d. 11th m.
	Portsmouth, do. 8 mo.		Falmouth 5th d. bef. 1st 6th d. 6th mo.
Salem Quarter.	Dover 4th 5th d. 1st m.	Smith- field Quarter.	Smithfield, 2d 5th d. 2d mo.
	Saybrook 4th 5d 4 m.		Northbridge, 2d 5th d. 5th m.
	Berwick 4th 5d 8 m.		Bolton, 2d 5th d. 8th mo.
	Salem 4th 5d. 10th m.		Leicester, 2d 5th d. 11th mo.
Sandwich Quarter.	New Bedford 6 d. bef. last 1st d. 3d m. and 2d 6th d. 12th m.		
	Nantucket 3d d. after 4th 6th d. 6th m.		
	Sandw. 1st 6th d. 10m		

## ECLIPSES for 1813.

There will be four eclipses this year, viz. two of the Sun and two of the Moon, alternately, as follows :

I. Feb. 1, the Sun will be eclipsed in the morning, too early to be visible in Boston.

II. Feb. 15, the Moon will be visibly and partially eclipsed, in the manner following :

Beginning	-	2h. 26m.	} morning.	{ Digits eclipsed, 7° 45' O's south limb.
Middle	-	3 52		
End	-	5 18		
Duration	-	2 52		

III. July 27, the sun will be eclipsed, invisible at Boston ; but centrally on the meridian at 10h. 14m. morning, 1 $\frac{1}{2}$ ° west, and 5° north of Rio Janeiro, in South-America.

IV. Aug. 11, the Moon will be visibly and partially eclipsed :—

Beginning	-	8h. 56m.	} evening.	{ Digits eclipsed, 4° 25' )'s north limb.
Middle	-	10 4		
End	-	11 10		
Duration	-	2 14		

*An explanation of the Characters, &c. used in this Almanack.*

☿ Conjunction	☉☉ The Sun	♃ Jupiter
△ Trine, or 120°	☾☾☉ The Moon	♄ Saturn
□ Quartile, or 90°	☿ Mercury	♁ Herschel
♊ Opposition	♀ Venus	G. Elon. greatest elongation
♋ ascending node	⊕ Earth	G.V gr. variation
♌ descending node	♂ Mars	

*Names and characters of the signs in the Zodiac.*

♈ Aries, head	♌ Leo, heart.	♐ Sagittarius, thighs.
♉ Taurus, neck.	♍ Virgo, belly.	♑ Capricornus, knees
♊ Gemini, arms.	♎ Libra, reins.	♒ Aquarius, legs.
♋ Cancer, breast	♏ Scorpio, secrets	♓ Pisces, feet

The English names of the 12 Constellations, through which the Sun seems to pass in twelve months, are given in verse by Dr. Watts :

“ The *Ram*, the *Bull*, the heavenly *Twins*,  
And next the *Grub* the *Lion* shines,  
The *Virgin* and the *Scales* ;  
The *Scorpion*, *Archer*, and the *Goat*,  
The *Man* who holds the watering-pot,  
And *Fish* with glittering scales.

*Vulgar Notes for 1813.*

Lunar Cycle, or } 9	Epact 28	Dominical Letter C
Golden Number }	Solar Cycle 2	Roman Indiction 1

THE different manner in which some nations reckon time is as follows :—The ancient Jews, Athenians, and Italians, reckon from sunset. The Babylonians, Persians and Syrians, begin their day at sunrise, and count 24 hours. The Egyptians, like the English, begin at midnight. Astronomers and seamen begin the day at noon, and reckon 24 hours to the next day at noon.

# STAGE TABLE.

Stages.	Set off from	Day of the week	o'clock.
Albany	Market square	Tues Thurs Satur.	3 a m
Amherst	do.	Mond. Wedn. Friday	4 a m
Burlington	Elm street	do.	4 a m
Cambridge	Old state house	Twice every day	12 & 6
Canton	Market square	Mon. Tues. Thurs. Sat.	3 p m
Dedham	Brattle square	Every day, except Sund.	4 p m
Dorchester	Elm street	do.	4 p m
Gloucester	do.	do.	11 a m
Groton	Withington's	Mon. Wed. Friday	3 a m

## BAGGAGE WAGGONS.

Providence, (Guild's) from Boyden's, every Saturday, at noon.

Providence, (Morse's) from Clark's; every Wednesday at noon.

Salem, from Clark's, every day, at 3 P.M.

Salem and Newburyport, from Clark's, Tuesday and Thursday, at 3 P.M.

## RATES OF LETTER POSTAGE.

Every letter composed of a single sheet, conveyed not exceeding			
40 miles,	8 cts.	Over 150, not exceed 300,	17 cts
Over 40, not exceed 90	10	Over 300, - - 500,	20
Over 90 - - 150	12½	Over 500 - - -	25

Every letter composed of 2 pieces of paper, double these rates ; every letter composed of 3 pieces of paper, triple ; every letter composed of 4 pieces of paper, and weighing 1 ounce, quadruple these rates ; and at the rate of 4 single letters for each ounce.

Newspapers—100 miles, one cent—over 100, one cent and a half

# I. JANUARY hath 31 days. 1813.

Drear Winter comes, by angry tempests tost,  
 Array'd with snow and rivet: by frost.  
 Parling no more, conglaciated streams  
 Feel not the sun's oblique-descending beams.  
 Night's lengthen'd shades the wighs convivial hail,  
 While Bacchus prompts the jovial song or tale.

II.

FEBRUARY hath 28 days.

1813.

Now fraught with snow, slow-gath'ring clouds arise  
From the cold North, and darken all the skies.  
Keen Boreas sweeps, with chilling blast, the plains,  
While fleecy storms assault the mitten'd swains,  
Surcharge the roads, the traveller's course impede,  
And tire, with wading, th' impetuous steed.

6 Alliance with France '78—7 Mary Queen of Scots beh. 1587—  
British defeat in North Carolina '76

Venus will be Morning Star, or rise before the Sun, till 25th of  
May, 4h. 46m. morn.; after which she will be Evening Star, or set  
after the Sun. to the end of the year.

Strangely combin'd, see March alternate bring  
The chill of Winter with the warmth of Spring;  
And ice-bound streams to Phoebus' kindling ray  
Yield as he lingers o'er the face of day.  
Reluctant Winter from the plains distils,  
And dwells in forests, and on cloud-capt hills.

## IV. APRIL hath 30 days.

1813.

In gen'rous show'rs now welcome April flows,  
And *freshes* drink dissolv'd hyemial snows;  
While young *Vitality's* expansive force  
Opens the green buds, of future flow'rs the source.  
Earth joyful feels the genial warmth, and now  
Yields her rich soil, obedient to the plough.

MAY hath 31 days.

1813.

Now feather'd warblers, whose melodious notes  
Are grateful incense from unnumber'd throats,  
Who, in despite of adverse, frowning fates,  
Seek, with instinctive faithfulness, their mates;  
The verdant foliage and the fertile sod  
Teeming with life, bespeak a present God.

B

And now bright Phoebus, from his orient orb,  
Scatters a golden lustre o'er the globe.  
The crimson'd rose its fragrant scent exhales,  
And balmy odours mingle with the gales :  
The blooming landscapes smile in flow'ry pride,  
And countless lilies drink th' aerial tide.

JULY hath 31 days.

1813.

While nature droops beneath the fervid glow,  
No dull inaction the industrious know;  
But the keen scythe the hardy lad's for swings,  
And the tall grain in rugged swathes he flings;  
While foll'wing boys, with rake and pitch-fork join,  
And thinly spread the mower's compact line.

IX. SEPTEMBER hath 30 days. 1813.

To bleſs mankind, now Plenty pours her horn :  
And bounteous Ceres waves her fields of corn,  
The bluſhing fruits, from pendant boughs, delight  
The longing eyes ; the hands to pluck, invite.  
So wanton Eve, by ſtrong deſires aſſail'd,  
Pluckt fruit forbid, and death on all mankind.

OCTOBER hath 31 days.

1813.

Now storms engender in autumnal skies ;  
 And strew'd on earth, the ripen'd fruitage lies :  
 No longer nourish'd by its subtle flame,  
 Retreating life, the falling leaves proclaim :  
 Where fields spread lately in luxuriant pride,  
 There grazing herds are scantily supply'd.

# XI. NOVEMBER hath 30 days. 1813.

We'll breathe thankgivings to th' eternal King,  
 Since the rich treasures of his mercy bring  
 Stores in profusion to supply our wants,  
 Who food, if hungry, naked, clothing grants;  
 The feeble flame of life, who still sustains,  
 Quells rising anguish, soothes distressing pains.

## XII. DECEMBER hath 31 days. 1813.

Lo! now December takes his dismal stand,  
And waves an icy sceptre o'er the land:  
Deep in our ears his warning accents roll,  
And wake reflection dormant in the soul:  
"Time flies" exclaims; and startled mortals hear,  
While vast oblivion gulphs the year! —

## POETRY, &c.

### *Adam and his Wife.*

Adam alone could not be easy,  
So he must have a wife, an 't please ye:  
But how did he procure this wife,  
To cheer his solitary life?  
Why, from a rib cut off his side  
Was form'd this necessary bride,  
But how did he the pain beguile?  
Pho! he slept sweetly all the while.  
But when this rib was re-applied  
In woman's form to Adam's side,  
How then, I pray you, did it answer?  
He never slept so sweet ag'in, sir.

*A Dutchman's breakfast & raccoon hunt.*  
in de m. rin ven yu kits oop, I dakes  
a rite: unt ven yu kums tre o-ler vour  
mielt, I trink a chill of shinn; den ven  
yu kits tre mielt funder, I trinks anuder  
chill of shinn. Unt ven yu ish peen kum  
tu mi brud ler Mycallsh, won oder mieit-  
stones funder, I trinks a tird chill; unt  
I dels yu vat I eats for mine prakefast:

25 ekks, 3 piskets,  
1 tuzen picklet herinks,  
1 yung shicken,  
2 oder tre poutshes liddel rettishes,  
haaf tuzen liddel piskets,  
1 ret kappiges unt finegars,  
15 kups of k ffee,  
1 oder 2 c.ills of shinn,  
wid oder nig-nags.

Unt I dels mi brudder Mycallsh if he ish  
cot any coot cidersh? unt he ask'd me  
'Yish, he's cot sum e'ksheleat sou beer,  
unt he's sorri its peen all gone.' Den  
mi hors Tobbins unt me kit mount our  
sattles upon our pellies, wid mi brudder  
Mikallsh hors on him, unt rite as if de  
ferry tivels was before us, to hunt de  
harracoon. Unt I dels mi broder My-  
callsh iff I vill climps de dree oop, unt  
shaak town de harracoon. So ven we  
hat peen shase im goot vile, he climpt de  
dree oop, unt I catsh im behinds; but de  
tivel skin m'ite vaater in mine eyes, unt  
plint me so I dumble from de pottom of  
dree to de top, shlam pang vlat on my  
preeches behind. Unt mi brudder My-  
callsh s: 'Stupoy, mi tog Fowler!' 'Get  
out, you tivel-skin!' 'Vat, is it yu?'  
'To pe sure it is.' 'Pe yu tead?'  
'To pe sure I am, for mi collar-pone is  
proak.' So we catsh nopody but wun  
tam dumbles, unt prake my pipes unt  
topacco, pesites 'spill all mi shinn pottle  
in a hundret pit into the pargain.

The Caimucs, a tribe of Tartars sub-  
ject to the Russian government, have  
small wooden wind-mill wings fixed  
at the entrance of their huts called *praying*  
*machines*; on which the owner causes  
certain prayers to be written by the  
priests, that they may be turned round  
by the wind, and he is thereby freed  
from the trouble of repeating them  
himself. The priests have likewise a  
very commodious method of expediting  
their prayers; when they have a num-  
ber of petitions to offer up for the peo-

ple, they, for this purpose, make use of  
a cylindrical wooden box, into which  
they throw the written prayers; and,  
having placed it perpendicularly on a  
stick, they sit down beside it, pulling  
it backwards and forwards with a string,  
gravely smoking their pipes while per-  
forming the ceremony; for, according  
to their doctrine, in order to render  
prayer efficacious, it is only necessary  
to put it in motion; and it is a matter  
of indifference whether this be done by  
means of the lips, of a wind-mill, or of a  
cylindrical box.

Socrates, being abused and kicked by  
an insolent and audacious youth, and  
seeing the people around him greatly  
incensed thereat, and ready to revenge  
it, exclaimed, "How now, my friends,  
if an ass had kicked me with his heels,  
would you have had me return the  
blow?"

A hardened wretch, who was going  
to be hanged, in his way to the place of  
execution, ordered the cart to stop at a  
public house, and asked the landlord  
whether he had not lately lost a silver  
cup? He answered in the affirmative,  
and the malefactor said, "well, make  
us a drink, and I will give you tidings  
of it." The abandoned wretch then  
declared, "it was I who took your cup,  
and you may rest assured, that the next  
time I come this way, you shall have  
it again."

*Charles James Fox.*

From infancy to manhood, it was the  
practice of his father, Lord Holland, to  
show him the most unlimited indul-  
gence. The following story is told in  
proof of it. Master Charles, when six or  
seven years of age, one day strutted into  
the kitchen, and while dinner was cook-  
ing, and a pig roasting at the fire, he  
amused himself with making water upon  
the unresisting porker. It was a standing  
order of the house to contradict him in  
nothing, so there was nothing to be  
done—but to let the pig be so basted.  
The cook, however, thought it fair to  
give the guests warning of the sauce to  
it, which he did, by sending up the fol-  
lowing lines upon a label in its mouth:

If strong and savoury I do taste,  
'Tis with the liquor that did me baste:  
While at the fire I foam'd and hiss'd,  
A Fox's cub upon me . . . .

A witty knave bargained with a seller  
of lace in London, for as much as would  
reach from one of his ears to the other.  
When they had agreed, it appeared that  
one of his ears was nailed to the pillory  
in Bristol.

Some years ago the junior Sheridan,  
who inherits a large portion of the wit  
and genius of his father, was dining  
with a party of his father's constitu-  
ents, at the Swan in Stafford. Among  
the company were, of course, a great

many shoe-makers (I beg their pardon, I mean shoe manufacturers.) One of the most eminent of them was in the chair, and in the course of the afternoon, he called to young Sheridan for a sentiment. "This call not being attended to, the president, in rather an angry tone, repeated it. Sheridan, who was entertaining his neighbour with a story, appeared displeased at this second interruption, and desiring a bumper might be filled, he gave—"May the manufacture of Stafford be trampled upon by all the world." It is needless to say that this sentiment, given with apparent warmth, restored him to the good graces of the president.

When the late Lord-Paget was ambassador at Constantinople, he, with the rest of the gentlemen who were in a public capacity at the same court, determined on one *gala day* to have each of them a dish dressed after the manner of their respective countries, and Lord Paget for the honour of England, ordered a piece of roast beef and plum pudding. The beef was easily cooked, but the court cooks not knowing how to make a plum pudding, he gave them a receipt, "So many eggs, so much milk, so much flour, and a given quantity of raisins, to be beaten up together, and boiled for three hours in five gallons of water." When dinner was served up, first came the French ambassador's dish; then that of the Spanish ambassador; and next, two fellows, bearing a tremendous pan, and bawling "*Recm for the English ambassador's dish!*" "By the mother that bore me" cried his lordship, "I forgot the bag, and these stupid scoundrels have boiled it without one, and in five gallons of water too! It will be good plum broth, however."

After a loud preface of *Oyez!* pronounced most audibly three times in the High-street at New Market, England, the late crack brained lord Barrymore, having collected a number of persons together, made the following proposals to the gapers:—"Who wants to buy a horse that can walk 5 miles an hour, trot 18, and gallop 20?" "I do," said a gentleman with manifest eagerness. "Then (replied lord Barrymore) if I see any such animal to be sold, I will be sure to let you know."

When a noted state criminal was tried at Edinburgh for sedition, the lord justice Clark asked him, "Hae you any counsel, mon? No. Do you want to hae any appointed? I orly want an interpreter, to make me understand what your lordship says."

Ned Shuter, the comedian, was often very poor, and being still more negligent than poor, was very careless about his dress. A friend overtaking him one day in the street, said to him, "Why Ned! are you not ashamed to walk the streets with twenty holes in your stockings; why don't you get them mended?" "No,

my friend, (said Ned) I am above it; and if you have the pride of a gentleman, you will act like me, and walk with twenty holes, rather than have one darn." "How, how," replied the other, "how the deuce do you make that out?" "Why," replied Ned, "a hole is the accident of the day; but a darn is premeditated poverty."

Henley's audience at his oratory was generally composed of mechanicks: he once attracted together an immense number of shoemakers, by advertising "that on the following Saturday he would lay open to the public a mole by which a pair of shoes might be made in four minutes, and demonstrate the ease and certainty of this new method, by performing it in the face of the audience." He did so,—by producing a pair of boots, and cutting the feet off.

A man, who had climbed up a chestnut tree, had by carelessness mislaid his hold of one of the branches, and fell to the ground with such violence as to break one of his ribs. A neighbour coming to his assistance remarked to him drily, "that had he followed his rule in these cases, he would have avoided this accident." "What rule do you mean?" said the other indignantly. "This," replied the philosopher, "never to come down a place faster than you go up."

A poor fellow in Scotland, creeping through the hedge of an orchard, with an intention to rob it, was seen by the owner, who called out to him, "Sawney, hoar hoar, mon, where are you ganging?" "Bock agen," says Sawney.

A Frenchman, on landing at Dover, went into a barber's shop to get shaved. The poor man's cheeks were so much collapsed, that the barber was under the necessity of thrusting his fingers into his customer's mouth to assist the operation. "O mon dieu, mon dieu! exclaimed the Frenchman, whilst the barber was dashing away, me he damnably cut." "Confound your thin lantern jaws, (replied Streep,) I have cut my fingers cursedly through your cheek!"

#### A Poet's Epitaph.

Reader, this grave and moss-incumber'd stone

The mouldering ashes of a poet hold.

He by his trade subsisted. Reader, think,

How many jests the rascal must have told!

One of the members of the Virginia legislature called to a lad of colour, whom he mistook for one of the hotel in which he lodged, "to bring him a jack and take off his boots." "O yes, to be sure, to be sure, sir, please your honour," replied the arch son of Cain, and skipping away at a lamp-lighter's gait, was back in a moment, and completely took off the gentleman's boots, that they have not been heard of since.

## WHO CAN NUMBER THE STARS, OR BIND THE INFLUENCES OF THE PLEIADES ?

The number of the fixed stars is almost infinite, tho' the number seen by the naked eye in the whole heavens does not exceed 3000; but a good telescope, directed almost indifferently to any point in the heavens, discovers multitudes of stars invisible to the naked eye. That bright irregular zone, the Milky Way, has been carefully examined by Dr. Herschel; who has in 20 minutes seen 116,000 stars pass thro' the field of view of a telescope of only 15' aperture.

*Table of the Solar System.*

	Diameter.	Distance from the	Rotations round	Time of revolving
	<i>Miles.</i>	Sun. <i>Miles.</i>	their axis. <i>Days, ho. min. sec.</i>	round the Sun. <i>Days, hours, mi.</i>

Herschel	35,112	1,800,000,000	Unknown.	30,737 18 0

\* Ceres was discovered in 1801, by M. Piazzi, at Palermo in Sicily.

† Pallas was discovered in 1802, by Dr. Olbers, at Bremen in Lower Saxony.

Two other planets have since been discovered. The planet *Juno*, situated between the orbits of Mars and Jupiter, was discovered September 1, 1804, by Mr. Harding, at the observatory of Lilienthal, near Bremen. Its diameter and its mean distance are less than those of the other new planets. It is distinguished from all the other planets, by the great eccentricity of its orbit; and the effect of this is so extremely sensible, that it passes over that half of its orbit which is bisected by its perihelion in half the time that it employs in describing the other half which is further from the sun. From the observations made, it must have an atmosphere more dense than that of any of the old planets of the system. Its annual revolution, 4 years 128 days; diameter in English miles 1,425.

The planet *Vesta* was discovered March 27, 1807, by Dr. Olbers. From the regularity observed in the distances of the old planets from the sun, it was supposed a planet existed between the orbits of Jupiter and Mars. The discovery of Ceres confirmed this happy conjecture; but the opinion respecting the harmony of the solar system appeared to be completely overturned by the additional discovery of Pallas and Juno. Dr. Olbers, however, imagined that several more might be discovered, in opposite regions of the heavens, and examined till his labours were crowned with success. *Vesta* is of the fifth or sixth magnitude, and may be seen in a clear night by the naked eye. Revolution 3 years, 66 days, 4 hours.

### COMETS.

44 ye ars before Christ, at the period of the assassination of Julius Cæsar, perhaps the greatest comet appeared, accompanied by unusual commotions in all the elements. So powerful was the influence of this comet as even to diminish the transparency of the atmosphere, rendering the solar light defective and sickly, which dimness of the sun Pliny asserts continued a whole year. This is supposed to have been the same comet that appeared in 1680, during the lifetime of Sir Isaac Newton.\*

\* Sir I. Newton has computed the heat of this comet, when nearest the sun, to be 2000 times hotter than red hot iron; and a ball of iron as big as the globe of our earth, would, if red hot, require 50,000 years to cool in; of course, the bodies of comets being much greater than our earth, cannot be cold at their greatest distance.

N.B. To understand the use of this Table—against 2 dollars for one week you will find the Interest to be 2 mills—for one month, 1 cent—and for one year, 12 cents.

When Christ at Canna's feast by pow'r divine,  
 Inspir'd cold water with the warmth of wine,  
 See, cry'd they, while in redd'ning tide it gush'd,  
 The hateful stream hath seen its God and blush'd.

LINES BY SHERIDAN.

I ne'er could any lustre see, In eyes that did not look on me, I ne'er saw nectar on a lip, But where my own did hope to sip. Has the maid, who seeks my heart, Cheeks of rose, unstain'd by art? I will own their colour true, When yielding blushes aid their hue.	Then her hand so soft and pure, I must press it, to be sure; Nor can I e'en be certain then, Till it I grateful press again. Must I, with attentive eye, Watch her heaving bosom's sigh? I will do it when I see That heaving bosom sigh for me.
---	---

Then her hand so soft and pure,  
I must press it, to be sure ;  
Nor can I e'en be certain then,  
Till it I grateful press again.  
Must I, with attentive eye,  
Watch her heaving bosom's sigh ?  
I will do it when I see  
That heaving bosom sigh for me.

THE IRISH PLACE-HUNTER.

A place under government	He married soon a scolding wife,
Was all that Paddy wanted;	And Paddy's wish was granted.

## PAPER

was invented by the Egyptians, and made at first of sedgy weeds called Papyri, growing upon the muddy shores of the Nile, from which it took its name. By this invention, Ptolemy Philadelphus, king of Egypt, was enabled to furnish his vast library at Alexandria; and finding that Attalus king of Pergamus, by the help of Egyptian paper had resolved to form a greater library, he prohibited the carrying paper out of Egypt. Attalus, encountering this disappointment, invented

VELLUM AND PARCHMENT,

made of calves and sheep skins, which exceeding in use and durability the former invention, the Egyptian paper went out of use; as our paper, made of rags, has now superseded vellum and parchment.

When Darius offered Alexander ten thousand talents to divide Asia equally with him, he answered, The earth cannot bear two suns, nor Asia two kings.—Parmenio, a general of Alexander's, hearing the offers Darius had made, said, Were *I* Alexander, I would accept them. So would I, replied Alexander, were *I* Parmenio.

A country clergyman meeting a neighbour who never came to church altho' an old fellow of above 60, reproved him, and asked if he never read at home? "No, (replied the clown) I cannot read." "I dare say, (said the parson) you do not know who made you." "Not I, in truth," cried the countryman. A little boy coming by at the same time, "Who made you, child?" asked the parson. "God, sir," answered the boy. "Why, look you there, (quoth the clergyman) are you not ashamed to hear a boy of 5 or 6 years tell me who made him, while *you*, that are so old a man, cannot?" "Ah! (said the fellow) it is no wonder that he should remember; *he was made but the other day: it is a great while, maister, since I was made.*"

#### SILK.

Till the reign of the emperor Justinian, the caterpillars, called silk worms, who feed on the leaves of the white mulberry-tree, were confined to China; and this production, at an immense expense was transported over land the whole latitude of Asia in 243 days, from the Chinese ocean to the seacoast of Syria. Two monks, who had long resided in China, amidst their pious occupations had viewed with a curious eye the common dress of the Chinese, the manufactures of silk, and the myriads of silk-worms, whose education (either on trees or in houses) had once been considered as the labour of queens. They soon discovered that it was impracticable to transport the short-lived insect, but that in the eggs a numerous progeny might be preserved in a distant climate; and they deceived that jealous people by concealing them in a hollow cane, and returned in triumph with the spoils of the East. Under their direction the eggs were hatched at the proper season by the artificial heat of dung; the worms were fed with mulberry leaves; and a sufficient number of butterflies saved to propagate the race, and establish the manufacture in Greece, and finally in Italy and France.

#### DETACHED SENTENCES.

Those choice maxims, established by the experience of the wisest men in all ages and treasured up in the memory, are the best guides for the direction of our conduct in life.

Four things should never flatter us; familiarity with the great, the caresses of women, the smiles of our enemies, nor a warm day in winter, for these things are not of long duration.

He that thinks to content his desires by the possession of what he wishes for, is like him who would quench fire with straw.

He who dares to be virtuous and great, and to *appear* so, arms the self-love of all common people against him.

*Women* talk about trifles; & *men* dispute about things of no consequence.

The good nature of a fool is disgusting, but the smiles of a wise man are a balm to the soul.

For sake not an old friend, for the new is not comparable: a new friend is as new wine; when it is old, thou shalt drink it with pleasure.

Excess of ceremony shews want of breeding. That civility is best, which excludes all superfluous formality.

Would we know ourselves, we should not altogether neglect the opinion that others may maintain of us.

When one asked Diogenes how he might be avenged of his enemies, he replied, "to be yourself a good and honest man."

#### WHAT'S HONOUR?

Not to be captious: not unjustly fight:

'Tis to confess what's wrong, and do what's right.

Antisthenes spake incomparably well; "that if a man would live a safe and unblameable life, it was necessary that he should have very ingenuous and faithful friends, or very bad enemies: because the first by their kind admonitions, would keep him from sinning, the latter by their invectives."

#### DARK DAYS.

Octob. 21, 1716; Aug. 9, 1732; Oct. 19, 1762, at Detroit; May 23, 1780, was noted as a remarkable dark day in New England, in so much that candles were lighted to dine by; Oct. 9 and 15, 1785, in Canada; Oct. 29, 1789, in Kentucky. On all these occasions, it was necessary to light candles to pursue ordinary occupations.

One of the most terrible sorts of darkness was that brought upon Egypt. It is said so have been "a darkness which might be felt;" that is, a darkness consisting of black vapours and exhalations, so condensed that they might be perceived by the organs of feeling.

#### MARINER'S COMPASS.

The difficulty and danger of sea voyages from the earliest ages operated as a powerful impediment to navigation. It frequently happened that a long continued obscuration of the heavenly bodies, in stormy weather, was attended with destruction to whole fleets, which were driven on shore, without any possible means of foreseeing or avoiding the danger. In the year 1300 the magnetic power to give polarity to metallic bodies was discovered, and a compass was constructed, which, at all times, would instantly refer the pilot to any point or course he wished. This truly great and wonderful discovery was made by Goya, at Venice. Columbus, in his adventurous voyage of discovery, first perceived the variation of the compass: this irregularity in the magnet, tho' arising from unknown causes, is found however to be reducible to such established rules, as not much to lessen the usefulness of the instrument. Innumerable difficulties attending navigation vanished, the fearless mariner traversed oceans, a new world was brought to

light, it opened new sources of communication, intelligence, and improvement, and was a grand epoch to commercial nations.

#### ART OF PRINTING.

The inventor of typography, or printing, was John Guttenburg, of Mentz, or, according to others, Laurens Koster, a Dutchman, about the year 1440; the greatest advantage that ever the commonwealth of learning received. In the year 1772 the pay of a laboring man was but three half pence per pay, when the price of a Bible with commentary, fairly written, was 30*l*. So that that valuable book, which can be obtained, by labourers in general, for the price of one day's work, would then have cost them more than thirteen years' labor.

#### GUNPOWDER.

The inventor of guns was Berthold Swartz, a German, by profession a monk; who being addicted to the study of chemistry, and compounding a physical medicine of nitre, a spark of fire fell into it, and made it fly upward. He afterwards made a composition of powder, and including it in an instrument of brass, found it answer his intention; and by this accident came the invention of guns, which grew into use about the year 1400 in a fight between the Genoese and Venetians; in which the Venetians made such slaughter among the Genoese, that they stood amazed to find their soldiers killed and wounded, without the use of the usual weapons, and thought it the work of demons; and not of men. Others have attributed the invention to Archimedes, who destroyed the Roman fleet at the siege of Syracuse.

#### NAVIGATION.

The first navigators and builders of ships were the Phœnicians, who inhabited near the seaside; but their invention extended no farther than to open vessels; the Egyptians added decks, and invented galleys of 2 banks of oars on a side. Ships of burden and stowage were first made by the Cypriots; smacks, hoys, cock-boats, and skiffs, by the Liburnians; brigantines by the Rhodians, and vessels of war by the Pamphilians: the Boeotians invented oars; Dedalus of Crete masts and sails; the Tuscans anchors: the rudder, helm, and the art of steering, was found out by Typhis, who took his hint from seeing a kite, in flying, guide her whole body by her tail.

#### A GOOD CONSCIENCE.

What stronger breast-plate than a heart untainted?  
Thrice is he arm'd, that hath his quarrel just;  
And he but naked (though lock'd up in steel)  
Whose conscience with injustice is corrupted,

#### HYPOCRISY.

Says Tom, one day, of late grown grave,  
To virtue strangely given,  
"Of worldly wealth no care I have,  
"My treasure is in heaven."  
"I've always thought so," answer'd Ned,  
"If ever you had any;  
"But *there*, I'm certainly afraid,  
"You'll never find a penny."

Once, in a disputation at table, Socrates inveighed rather too bitterly against one of his familiars before all present. "Were it not better (quoth Plato) to have told him of this privately, and not thus to have shamed him before all this company?"—"And you also (answered Socrates) might have done better to have said this to myself, when you had found me alone."

### ALEXANDRIAN LIBRARY.

The Bruchion part of the Alexandrian library, consisting of 400,000 volumes, was burnt by accident by the soldiers of Julius Cæsar, 52 years before Christ; and the Serapion, of about 300,000 volumes, by the emperor Theodosius, anno 391, by the exhortations of the bishop Theophilus. Its final destruction was completed by the Arabs, 648, when the volumes were distributed to the 4000 baths of the city for fuel, and, such was their incredible number, they were 6 months in burning.

Woodstock, 3d Mondays in Sept. and March. Chelsea, 2d Mondays in June and Dec. Craftsbury, first Mondays in March and Nov. Danville, 1st Mon. in Jan. and last Monday in June. Guildhall, 2d Mond. in June and Dec. Brownington, 4th Mon. in Aug. At N. Hero, 1st Mon. in Mar. & Sept.

### Probate Courts.

#### GENERAL INFORMATION RESPECTING PROBATE BUSINESS.

*An executor should notify the heirs, or persons interested in a will, of the day he intends to offer it for probate, that they may have opportunity to contest the probate thereof, should they see cause; otherwise the judge may be obliged to postpone proving the will, and to cite the heirs. An executor, knowing of his appointment, must cause the will to be proved within 30 days after the decease of the testator, or present the said will to the probate court, and in writing declare his refusal; otherwise he will be liable to a heavy fine. When a person dies intestate, the widow, or next of kin to the deceased (if of age) must within 30 days take out a letter of administration, or, in writing, declare his refusal of the trust. Guardians may be appointed to minors before the estate is distributed, and before the account of administration is allowed. When executors or administrators are prepared to exhibit their accounts to the judge for allowance, they are to notify the persons interested therein, or their guardians, to be present in court at the examination thereof; unless the heirs and guardians will previously examine the account to be exhibited, and certify thereon their approbation of it. This method may save much trouble and expense. The same steps should be taken with creditors, when an estate is insolvent; that is, they must be notified as aforesaid, or they must certify as aforesaid. Administrators who are not desirous to account with the judge for the personal estate as appraised, are to give notice thereof at the time they return the inventory, and then obtain an order to sell the whole, or such part as the judge shall direct. And the heirs also, if they apprehend that the personal estate is appraised at less than its value, should state the same to the judge, and request to have it sold at auction, or at private sale.*

# PROBATE COURTS IN MASSACHUSETTS.

*County of Suffolk*—At the Probate Office, every Mond. in the year, except the first Monday in each month.

*Norfolk*—Dedham, first Tuesday in each month; Quincy, second Tues. of Feb. May, Aug. and Nov.; Wrentham, in first parish two terms in a year, at such place and time as the Judge shall appoint.

Salem, 3d Mondays of Jan. April, July, and Oct. and the Tuesdays following. Marblehead, Wednes. and Thurs. following the 3d Mon. of Jan. April, July, and Oct. Newburyport, Thurs. and Fri. following the first Mon. in Mar. June, Sept. and Dec. Andover, the Thurs. & Fri. following the first Mon. of May, Aug. & Nov. Gloucester, Tues. and Wedn. next after the 2d Mond. in May, Aug. and Nov.

*Middlesex*—Cambridge, 2d Tues. in Jan. May, Nov. and Dec. and last Tues. in Aug. Concord, 2d Tues. in April and June, and first Tues. in Oct. and Dec. Groton, 4th Tues. in May, and 3d Tues. in Oct. Framingham, 3d Tues. in June, and 2d Tues. in Oct. Woburn, 4th Tues. in April. Chelmsford, 3d Tues. in Sept.

*Worcester*—Worcester, first Tues. in every month. Templeton, the Thurs. next after 3d Tues. in May, and the 3d Tues. in Oct. Brookfield, 2d Tues. in April, and 4th in Oct. Lancaster, 3d Tues. in May & Nov. Uxbridge, 4th Tues. in May & Nov.

*Hampshire*—At Springfield, on the Wedn. next after the 2d Tues. in Feb. the 3d Tues. in July, & 4th Tues. in Oct. at the house of E. Williams. —Greenfield, 1st Tues. of Jan. and March, the 2d Tues. of May, July, and Sept. and 3d Tues. of Nov. at the house of Calvin Munn. —Westfield, 2d Tues. of Feb. 3d Tues. of July, and 4th Tues. of Oct. at the house of Gad Palmer. —Amherst, 2d Tues. of April, last Tues. in June, & 2d Tues. of Oct. at the house of Sam'l D. Ward. —Munson, the Thurs. next after 2d Tues. in Feb. and 3d Tues. in July, at the house of Amos Norcross. —Northampton, 1st Tues. of Feb. April, June, Oct. and Dec. and 3d Tues. of Aug. at the house of Theo. Lyon. —New Salem, Wedn. next following 2d Tues. of April and Oct. at house of Nahum Bryant. —Chesterfield, 1st Tues. in May, and 3d in Oct. at the house of Jos. S. Baily. —Charlemont, the Wedn. next after 1st Tues. in Jan. and 2d in July, at the house of Joel Hall. Courts will open at 9 A.M.

*Plymouth*—At Scituate, the first Mondays in March, June, Sept. and Dec. At Plympton, the first Mondays in Jan. Feb. May, July, August, October, and November, and the first Tuesday in April.

*Bristol*—The first Tuesdays of each month as follows: Taunton, in Jan. Mar. & Aug.; Norton, in July & Dec.; Rehoboth, April & Sept.; Dighton, June & Nov.; New-Bedford, May & Oct.; Freetown, in Feb.

*Barnstable*—2d Tues. of April, May, June, Sept.—Great-Marshes, 2d Tues. of Jan. Feb. July, Dec.—Yarmouth, 2d Tues. of Aug.—Sandwich, 2d Tues. of Nov.—Falmouth, day after the court is held in Sandwich. —Brewster, 3d Tues. of March, and 2d Tues. of Oct.—Harwich, the Mondays preceding the holding the courts at Brewster;—East-ham, the Wednesday following;—Wellesfleet, on the Thursday following.

*Cumberland*—Brunswick, 3d Wedn. in May. Northyarmouth, 3d Wedn. in July. Standish, 1st Wedn. in Aug. New-Gloucester, first Wedn. in Oct. Freeport, first Wedn. in Nov. Gorham, first Wedn. in Feb. Portland, 2d Wednesdays of every month except March, and 4th Wedn. of every month except May, June, and Nov.

*York*—York, 2d Mond. in Feb.; Satu. next before 3d Mon. in April; the Mond. next before 3d Tues. in May; and 3d Mond. of July.—Alfred, Satur. next before 1st Mond. in Jan.; the Satur. next before 2d Mon. in Sept.; & the Mon. next before last Tues. in Oct.—Kennebunk, 3d Mon. in March, June, Aug. and Nov.—Doughty's Falls, the Tues. next following the third Monday in June.

*Lincoln*—Wiscasset, the Wedn. preceding 2d Mon. of Jan.; 1st Mon. of Mar.; the Satur. preceding 2d Mon. of May; and Satur. after 1st Tues. of Sept.—Newcastle, the Thurs. preceding 2d Mon. of Jan. and 5th Thurs. after 4th Tues. in May.—Waldoboro', Fri. before 2d Mon. of Jan. and 5th Wedn. after 4th Tues. in May.—Warren, Satu. before 2d Mon. of Jan. and 4th Tues. after 4th do. in May.—Thomastown, 2d Mon. of Jan. & 4th Mon. after 4th Tues. of May.—Dresden, Mon. after first Tuesdays in Mar. and Sept.—Bath, 2d Tuesdays of Mar. & Sept.—Topsham, the Wedn. after 2d Tues. of March and Sept.

*Hancock*—Castine, 4th Tues. of every month, except Sept. Frankfort, 2d Mon. following the term of S.C. Bangor, next day after the Court at Frankfort. Bluehill, 2d Tues. in Oct.; at Surry, the day following.

*Oxford*—Waterford, the Sat. & at Buckfield the Mon. next preceding the Courts of C.P.—Paris, the first day of the sitting of the C.C.P.—Fryburgh, the 2d Tuesdays in Feb. April, June, August, Oct. & Dec.

*Kennebeck*—Augusta, the last Tuesday of each month (except Oct.) and on the 2d Tuesdays of April, May, June, July, and Aug. Monmouth, the first Monday, and at Winthrop the first Tuesday in June. At Mt. Vernon, the first Monday, and at Farmington the first Tuesday in Aug. Readfield, the first Thurs. in Aug. Waterville, the 1st Monday, and at Winslow the 2d Thursday in Sept. Vassalborough, 2d Friday in Sept.

*Somerset*—Norridgework, 1st Tues. & Canaan, the 1st Wedn. in Sept.

*Washington*—Machias, 1st Wedn. of March, May, Aug. Oct. and Nov. At Columbia, 2d Wedn. of June, and at Cherryfield the next day. At Dennyville, the second Wednesday in Sept.

#### PROBATE COURTS IN NEW-HAMPSHIRE.

*Rockingham*—Portsmouth, 3d Wedn. in June, Feb. and Oct.—Exeter, 3d Wedn. of March, July and Nov. and on the Monday preceding the 3d Wednes. in every month.—Londonderry, 3d Wednesdays of April, Aug. and Dec.—Epsom, 3d Wednesdays of May, Sept. and Jan.

*Strafford*—Same time as the Court C.P. Rochester, 2d Wedn. of May.

*Hillsborough*—Amherst, 3d Tuesdays of Feb. April, June, Oct. and Dec.—New-Ipswich, 3d Tuesday of Aug.—Hopkinton, the Tuesday preceding the first Wedn. in June, and on the 4th Tuesday in Oct.

*Chester*—Keene, 3d Wedn. of June; first Wedn. following 4th Tues. of Oct. and the first Wedn. following first Tues. in April.—Charlestown, first Wednesday following the 2d Tues. in May; the first Wed. following the 4th Tues. in Sept. and on the 3d Wednesday in Jan.

*Grafton*—Haverhill, last Tues. in Feb. April, June, Aug. Oct. & Dec.

To represent is but to perfonate,  
Which fhould be truly done at any rate;  
Thus they, who're fairly choſe without a fee,  
Should give their votes, no doubt, with liberty;  
But when a feat is fold by th' venal tribe,  
He represents them beſt,—who takes a bribe.

HARVARD College—1. Four weeks from Commencement. 2. Seven weeks from 4th Wedn. in Dec. 3. Two weeks from 3d Wedn. in May.

WILLIAMS' College—1. From Commencement 5 weeks. 2. Three weeks from 3d Wedn. in Jan. 3. Three weeks from 1st Wedn. in May.

Bowdoin College—From Commencement four weeks. 2. Six weeks from first Wedn. in Jan. 3. Three weeks from 3d Wedn. in May.

Divinity College (Andover)—From the annual Visitation, the last Wednes. in Sept. 6 weeks. 2. From first Wedn. in May 6 weeks.

DARTMOUTH College.—1. Four & half weeks from Comm. 2. From first Monday in Jan. six and a half weeks. 3. From 1st Monday preceding last Wednesday in May 2 weeks.

YALE College—1. From Comm. six weeks. 2. From 2d Wedn. in Jan. 3 weeks. 3. From Wedn. preceding 2d Thur. in May, three weeks.

PROVIDENCE College—From Commencement 3 weeks. 2: From the first Wed. in Dec. 8 weeks. 3. From first Wednesd. in May 2 weeks.

MIDDLEBURY College—From Commencement 3 weeks—2. From first Wednesf. in Jan. six weeks—3. From first Wedn. in May 3 weeks.

BURLINGTON College.—From Comm. 4 weeks.—2. From the Wedn. nearest the 15th Dec. 6 weeks.—3. From the Wedn. nearest 28th April two weeks.

HARVARD College---Commence at Boston, in Dec. annually.  
DARTMOUTH College---Commence on 1st Wednesd. in Oct. annually.
